

AICoach DAO — STRATEGIC OVERVIEW

DAO Concept & Five-Year Strategic Roadmap — The Decentralized Intelligence Ecosystem

1. Core Vision

AICoach DAO is an evolutionary ecosystem where humans and AI grow together through three layers of interaction:

- AI Layer: Data & Model Collaboration
- Community Layer: Knowledge & Social Growth
- Governance Layer: Decentralized Leadership

Goal: Train the community to train AI.

2. DAO Organizational Structure

DAO Layer	Role	Corresponding Rank	Key Function
Contributor DAO	Content and data contribution	L1–L2	Execute missions, create data, spread content
Community DAO	Quality management and mentoring	L3–L4	Training, QA, community operations
Core DAO	Leadership and strategic direction	L5–L6	Voting, treasury, policy, partnerships

3. Rank System — AICoach Hierarchy

Rank	Title	Core Role	DAO Layer
L1 – Explorer	Explorer	New member exploring the system	Contributor
L2 – Builder	Builder	Create and share content to expand awareness	Contributor
L3 – Trainer	Trainer	QA, guidance, and mentoring for others	Community
L4 – Master	Master	Moderate and manage community groups	Community
L5 – Visionary	Visionary	Lead DAO campaigns and partnerships	Core
L6 – Architect	Architect	Strategic council and treasury management	Core

4. DAO Growth Roadmap (2025–2030)

AICoach DAO evolves through five development phases across a five-year roadmap. Each phase expands operational scope, automates rewards and governance mechanisms, and moves toward a fully self-sustaining DAO.

Year	Phase Name	Core Focus	Key Outcomes & Milestones
2025	Phase 1 – Genesis & Formation	Community building and implementation of rank and reward systems.	- Launch AICoach App v1 - Achieve 5,000 initial users - Deploy referral and rank system - Begin manual DAO governance
2026	Phase 2 – Evolution & AI Integration	Integrate AI-related tasks and semi-automated reward mechanisms.	- Launch AI Data Task module - Enable bot-based mission tracking - Achieve 100,000 AI tasks completed - Activate community dashboard
2027	Phase 3 – Governance Expansion	Transition DAO governance to on-chain.	- Deploy voting via Snapshot - Enable AIC staking - Launch on-chain Treasury - NFT badges for Rank 3+ members
2028	Phase 4 – Partnership & Scale	Expand partnerships and open API ecosystem.	- Establish DAO alliances - Partner with AI/EdTech startups - Expand AIC token utilities (learn–mentor–earn) - Grow global community reach
2029–2030	Phase 5 – Autonomy & Sustainability	Full self-governance and long-term sustainability.	- Operate an independent Treasury - Launch DAO grant fund for AI projects - Ensure stable governance operations - Establish AICoach DAO as the 'AI Knowledge Republic'

5. DAO Manifesto

"We don't just build AI — we build the people who build AI."

AICoach DAO is not just a system to train machines, but a collective where humans learn how to evolve alongside AI. Every SAIC, every mission, and every rank represents one step in the evolution of collective intelligence.
